

# WEATHER VANES

## The Perfect Finishing Touch

Add a unique, personal touch to your home with an eye-catching copper weathervane. Good Directions weathervanes are heirloom quality and constructed to be a joy for generations. Good Directions weathervanes are beautiful, functional and express the pride customers have in their home. They are easy to install with both video and print instructions.

### OUR WEATHERVANES COME IN 3 SIZES

**ESTATE** - ideal for a larger home, garage, cupola, or barn.  
Dimensions: 41”L x 32”H x 34”W

**STANDARD SIZE** - ideal for a home, garage, cupola, barn, or gazebo.  
Dimensions: 23”L x 20”H x 23”W

**COTTAGE SIZE** - ideal for smaller structures, sheds and gazebos.  
Dimensions: 21”L x 19”H x 16”W

### Materials and Finish

Good Directions Weathervanes are forged in copper and brass. The assembly rods are made of black powder-coated steel.

### Polished Copper

Copper will age naturally in the weather; first to a dark penny shade, then to the familiar matte green patina in 10-20 years. To preserve the shine of the original polished copper, apply Incralac Spray Lacquer (see page 15).

### Blue Verde Copper

A Good Directions exclusive! This custom finish is a patina achieved through an accelerated oxidation process and then hand-waxed to protect the finish.

# FINIALS

Finials add a graceful finishing touch to any rooftop, turret or cupola and keep things looking up as they bring the eye skyward and make a dramatic statement.

The addition of a Finial Cap visually connects the finial to your rooftop. Good Directions' pure copper finials and caps are unsurpassed in style, quality, and durability. Our finials come in a variety of designs to suit any architectural style.

## Materials and Finishes

Our finials are made from copper with a brass stem. The steel mounting rod features a weather-resistant, black powder-coated finish.

### Polished Copper

Copper will age naturally in the weather; first to a dark penny shade, then to the familiar matte green patina in 10-20 years. Proximity to water like lakes or oceans will accelerate this aging process. To preserve the shine of the original polished copper and brass, apply Inralac lacquer spray (see page 15). If the green patina is desired, Good Directions can provide an all-natural recipe to achieve this result more quickly. Just ask.

*NOTE: The aging or oxidation process of metals like copper and brass is natural and protects the metal from corrosion. This process does not compromise the integrity of the copper and brass.*

## Assembly and Mounting

Roof mounts for finials are sold separately and need to be selected based on the desired placement and roof structure. Although finials are traditionally mounted to rooftops or cupolas, we offer other ways to display finials, including:

- Eave mounts
- Garden poles
- Indoor floor display

See page 15 for all our mounting options. Need advice? Call us at 800-852-3002. One of our knowledgeable Specialists would be happy to assist you in selecting the correct mounting hardware.

To mount a finial or weathervane to a cupola 30" square or larger, an extension rod will be needed.
